RÖSHULTS

2018 / 2019

Luxurious & Contemporary

The sophisticated moment. This desirable state of mind where the beautiful and the impeccable merge in time and space, awakening and captivating our senses. The stylish looks, the physical sensation, the smooth breeze, the beating of the heart and memories lasting forever.

Röshults lives for these seductive moments. Combining exclusive materials, such as teak and stainless steel, with a modern architectural design, we celebrate the luxurious aspects of the good life. The result is a unique concept of stylish, high-quality furniture designed for the discerning individual. Furniture in which comfort, elegance, and refined fulfillments intermingle effortlessly.

Presenting our 2018/2019 collection, we invite you to an even more luxurious lifestyle. Welcome!

Refining a lifestyle

Mats Broberg & Johan Ridderstråle
Creative Directors for Röshults

Refining a lifestyle

The history of Röshults begins with fire. From our first fire baskets to our current assortment of furniture, the original inspiration for our characteristic style is derived from flames. Made for strength and elegance through time, our design language is a result of our proud heritage and a curious mindset.

Our architects have a key role in nurturing our heritage as we enter and grow in exciting new markets. Mats Broberg and Johan Ridderstråle are two of Sweden's most renowned designers, with a well-known studio in Stockholm. As our creative directors, they work closely with our design team to preserve and develop our signature design idiom. Using carefully selected materials to create distinct forms with a simplistic touch, their designs demonstrate a synergetic combination of minimalism and magnificence.

The designer duo first met at the Stockholm College of Arts and Crafts, where they initiated their long-lasting and successful collaboration. After working on our first charcoal barbecue, it was a natural step to continue the development of our outdoor kitchen series. Today, Röshults offers an exclusive range of outdoor furniture, designed with a meticulous attention to detail. Broberg & Ridderstråle thoroughly focus on practicality and style, resulting in smart and elegant constructions, with the Booster Grill as the perfect example. Combining advanced engineering and contemporary design, the Booster Grill takes barbecuing to a whole new level. With infrasound technology, the charcoal grill is ignited within seconds. The control-knob, which is used to alter the level of infrasound, demonstrates an intuitively functional design inspired by classic hi-fi objects.

The collaboration with Röshults is also influenced by Broberg & Ridderstråle's personal interest in cooking. The designer duo finds inspiration in lively dinners with delicious food and wine, whether in the French Riviera or in the short but beautiful Swedish summer. It may seem somewhat strange that Swedes from the cold

“It looks simple,
but it is the most
difficult challenge
to undertake”

BROBERG & RIDDERSTRÅLE

and harsh north end up creating a collection of outdoor furniture, but if you think about it, it makes sense. To us, celebrating the joys of summer is even more important.

The Yacht Edition

THE ULTIMATE COLLECTION FOR THE LUXURIOUS LIFESTYLE

With a scrupulous attention to detail, we strive to create a range for the best of the best. The Röshults Yacht Edition is specifically made for the individual who settles for nothing less than perfection. With its extraordinary design, the range suits and enhances the most beautiful of ultra-exclusive settings.

For maximum durability, material choices are essential. Our Yacht Edition series is made of the finest teak and stainless steel, carefully selected high-quality materials that leave nothing to be desired. The design, reflecting our pursuit of excellence, combines timeless elegance with a modern architectural touch. The result is a perfect synergy between function and style, inspired by the exclusive yacht life. With its luxurious and contemporary design, the Yacht Edition celebrates sophisticated moments of relaxation and pleasure.

No. 316

By selecting the finest materials available, we ensure that our furniture have the highest quality possible. Therefore, we only use materials that can live up to our high demands regarding durability and aesthetics.

Stainless Steel no. 316L, also known as AISI 316L or EN 1.4404, is an ultra-durable stainless steel with extra corrosion resistance. With its superior strength, it is ideal for the outdoor kitchen. The material has an increased resistance to pitting corrosion, is durable at high temperatures, and is able to withstand harsh weather conditions. Demonstrating an elegant, bright surface, Stainless Steel no. 316L is a beautiful high-quality material – an obvious choice for our premium outdoor series.

The Barbecue Revolution

Power
Inside Out

The Booster BBQ Grill heats up in a rapid 3-5 minutes in contrast to the 20-30 minutes that an ordinary charcoal grill needs,

The intensity of the heat is easily regulated, ranging from 150° to 400°C. The temperature can be changed instantaneously.

Röshults Booster BBQ Grill is safer and more environmentally friendly than an ordinary charcoal barbecue, as unexpected flaming is prevented and smoke emission is minimized.

The consumption of charcoal is only a third of the amount required by an ordinary charcoal barbecue.

Booster BBQ Grill

INFRASOUND TECHNOLOGY

Röshults Booster BBQ Grill is a charcoal grill controlled by infrasound. Infrasound, also known as low frequency sound, cannot be heard by human beings. Yet, the infrasound is very powerful. With infrasound technology, we control the movements of molecules in each brick of charcoal. Pushed with energy, the molecules move faster, making the heat increase and the glow grow stronger. All within seconds.

Charcoal Grill VS Booster Grill

It usually takes between 5 and 10 minutes to light an ordinary barbecue. Once ignited, the barbecue needs another 20 minutes to heat up. All in all, an ordinary charcoal barbecue requires roughly 25-35 minutes until the temperature is fit for barbecuing. The slow ignition process is not the only problem an ordinary charcoal grill has. As the graph shows, the temperature continues to steadily increase, reducing the chance of achieving perfect results.

In contrast, Roshults Booster BBQ Grill can reach temperatures up to 400°C in only 5 minutes. In this time, an ordinary charcoal barbecue might not even be ignited yet. The intensity of the heat is easily regulated, as the Booster BBQ Grill operates with the use of infrasound technology. By increasing or decreasing the level of infrasound, the temperature can be altered instantaneously, allowing for perfect barbecuing conditions throughout the entire session. Consequently, the results are impeccable.

Gas BBQ Grill

THE ART OF BARBEQUE

The Röshults Gas BBQ Grill is the cornerstone of the designer outdoor kitchen. Designed by the award-winning duo Broberg & Ridderstråle, with no detail left to chance. The grill is equipped with thick stainless-steel grates, which store heat and give the food the desired grilling stripes. Each section has two Dual Burners, resulting in four burners per section with a combined output of 8kW/h. Double protection bars ensure an even heat distribution across the cooking surface. With two heat controls per section, you have maximum control of the grilling temperature, and the results are excellent.

Fats and oils dripping down from the food are collected in a removable bottom tray, that can be filled with sand and is easy to clean and dispose of after use. All of our gas grills are delivered with a slip cover, to hide the gas canister in a tidy and stylish manner. The Röshults BBQ Grills, together with our various outdoor kitchen products, enable you to build a versatile, practical and stylish outdoor kitchen that suits your unique needs. We also offer many accessories to complement your outdoor kitchen, for the best possible barbecuing experience.

CONNOISSEURS OF BARBECUING

The Röshults BBQ Grill, made for function, style and excellent barbecuing results, is praised by star chefs around the world. It is designed by the award-winning duo Broberg & Ridderstråle, with no detail left to chance. The Charcoal BBQ Grill, made of stainless steel, is solidly constructed for maximum durability. The grill is equipped with thick stainless-steel grates, which store heat and give the food the desired grilling stripes.

Fats and oils dripping down from the food are collected in a removable bottom tray, that can be filled with sand and is easy to clean and dispose of after use. The grill is easily cleaned by removing and emptying the detachable coal-ash tray, once the grill has cooled down. The Röshults BBQ Grills, together with our various outdoor kitchen products, enable you to build a versatile, practical and stylish outdoor kitchen that suits your unique needs. We also offer many accessories to complement your outdoor kitchen, for the best possible barbecuing experience.

The Kitchen Island.

CUSTOMISED KITCHEN ISLAND SATISFYING EVERY NEED

Combining style and functionality with an innovative approach, we aspire to create an outdoor kitchen for beautiful moments. A practical outdoor kitchen, carrying the timeless elegance of Röshults, perfectly suited to accommodate the discerning individual. The result is a personalised Kitchen Island, made to meet and exceed your expectations!

The solid base is made of stainless steel, suiting any larger terrace. Adding your selection of modules to fit the base, your outdoor kitchen is arranged in a stylish and accessible manner. Below each module, there is a large storage compartment with two removable shelves. The doors to the storage compartments have a push-open function. In each section you can select between, door, drawer or a fridge section. With the bar area, the Kitchen Island becomes a natural centre for social gatherings. Made upon order, Röshults Kitchen Island is customised to suit your exact preferences. It is available either with or without the bar, enabling you to personalise its size and functionality. The frames are adjustable in width of 2 modules up to 8, and each frame is adapted for gas hoses and water pipes. The doors are available in anthracite as well as in brushed stainless steel.

The Garden Easy Series

COMFORT AND STYLE FOR RELAXING DAYS IN THE SUN

Aspiring to create exclusive outdoor furniture for beautiful moments, we present our Garden Easy Series. The range is distinguished by its generous size, slim lines and evident form. A Garden Easy lounge is luxurious, yet laid-back. The series, designed by Broberg & Ridderstråle, consists of an armchair, a two-seat and a three-seat sofa, and a lounge table in three different sizes. Made of teak, stainless steel and weather-resistant sunbrella fabric, the Garden Easy Series is the perfect choice for the relaxing outdoor lounge.

Material Selection – Fast Dry

We now offer a new material selection called Fast Dry. With a concealed layer of fast dry under the fabric, condensation is prevented from building up, which in turn prevents weather damages. As a result, your outdoor furniture stays beautiful despite of harsh weather conditions.

Garden Easy Chair

Design: Broberg & Ridderstråle

Optional accessories

Indoor cover for cushions

Luxury Covers

We highly recommend you cover your furniture when not in use, for protection from outdoor elements. Our Luxury Covers, made to suit our various products, enable you to protect your furniture with style. Made of SurLast, an ultra-durable fabric, our Luxury Covers have an excellent resistance to water, UV-rays, mold and mildew. Treated with urethane, the fabric is prevented from stretching, shrinking, wrinkling or tearing. All seams are made of UV-resistant thread, and are laminated with watertight tape, with a water tightness up to 800 mm (Schmerber test). All covers come with drawstring, and have an extended height for additional accessories.

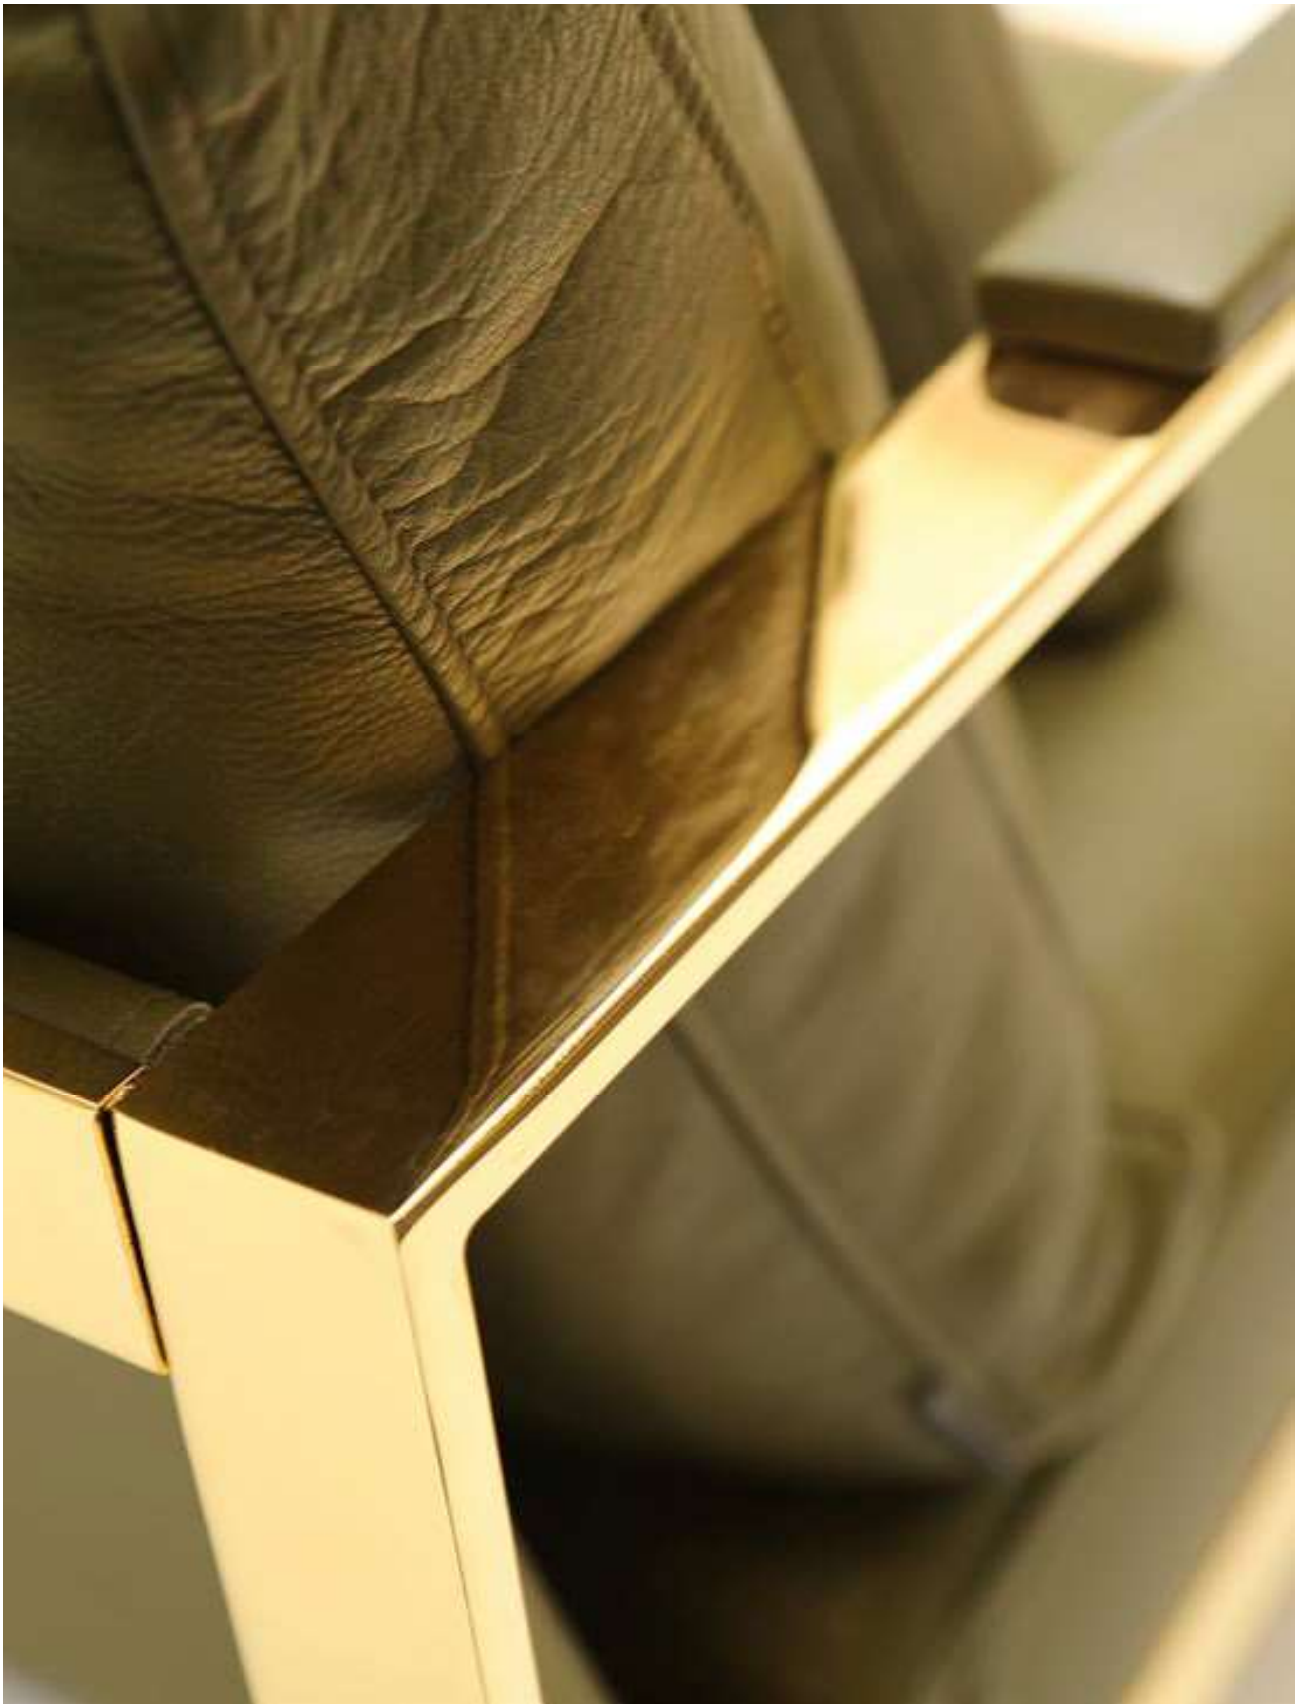

Part no: Luxury Covers are available for different products. Ask for specs.

Materials: 100% SurLast - Solution Dyed Polyester, Taped seams, Drawstring

Colours: Light Grey

Material Selection – Fast Dry

We now offer a new material selection called Fast Dry. With a concealed layer of fast dry under the fabric, condensation is prevented from building up, which in turn prevents weather damages. As a result, your outdoor furniture stays beautiful despite of harsh weather conditions.

Manhattan Low Cabinet

A shorter version of our classic Manhattan Cabinet. Makes a great hall furniture with the ability to sit on. There is no limit to how much you can make out of this product. Could just like the high version be equipped with shelves.

Design: Cornelia Norgren

Part no*: 100009

Materials: Mild Steel, Powder Coat, Concrete

Measure: L 300 D 300 H 600 mm / L 11.8 D 11.8 H 23.6 in

Weight: 25 kg / 55 lb

Colours: Anthracite, Other colours customized upon request

Manhattan Bench

Manhattan Bench is perfect for the hallway as well as the living room and kitchen. With its low height, it is comfortable to sit on – for example when changing shoes. When equipped with Manhattan Shelves, you can attain a beautiful and practical storage unit suited for your individual demands.

Design: Cornelia Norgren

Part no*: 100010

Materials: Mild Steel, Powder Coat, Concrete

Measure: L 924 D 300 H 450 mm / L 36.4 D 11.8 H 17.7 in

Weight: 57 kg / 126 lb

Colours: Anthracite, Other colours customized upon request

Manhattan Shelf

Make Manhattan even more flexible with the Shelf, an essential accessory made in Stainless Steel, just like the original. Custom colored according to your Manhattan Cabinet choice.

Design: Cornelia Norgren

Part no*: 100008

Materials: 2 mm Mild Steel, Powder Coat

Measure: L 300 D 230 H 30 mm / L 11.8 D 9 H 1.2 in

Weight: 2.6 kg / 6 lb

Colours: Anthracite, Other colours customized upon request

Manhattan Cabinet

Store magazines, firewood, wine bottles, shoes and clothes in a safe and stylish manner. With a design influenced by functionalism and minimalism, it is an appreciated addition to any home. The 4 mm walls of Stainless steel in combination with a steady foot of concrete gives a robust as well as elegant impression.

Design: Cornelia Norgren

Part no*: 100007

Materials: Mild Steel, Powder Coat, Concrete

Measure: L 300 D 300 H 1100 mm / L 11.8 D 11.8 H 43.3 in

Weight: 35 kg / 77 lb

Colours: Anthracite, Other colours customized upon request

Fire Basket Original

This majestic fire basket will brighten the dark nights of winter and create a cozy atmosphere in the late summer evenings. It is a centerpiece around which everyone can gather. Whether it is a castle or a humble cottage; a small family gathering or a big celebration, the Röshults Fire Basket is always an appreciated accessory.

Design: Anders Norgren

Part no**: 100000

Materials: Untreated Iron

Measure: L 280 D 280 H 700 mm / L 11 D 11 H 27.6 in

Weight: 4 kg / 9 lb

Colours: Raw (Untreated Iron)

Plate

Our plate fits Fire basket Original, Urban 50, Urban 70

Design: Röshults

Part no**: 100002

Materials: Galvanized Steel

Measure: L 600 D 600 mm / L 23.6 D 23.6 in

Weight: 4.9 kg / 11 lb

Colours: Raw (Untreated Iron)

Hilding

Hilding is our smallest fire basket in which you use standard outdoor candles to create an inviting glow.

Design: Anders Norgren

Part no**: 100001

Materials: Untreated Iron

Measure: L 100 D 100 H 420 mm / L 3.9 D 3.9 H 16.5 in

Weight: 1.4 kg / 3 lb

Colours: Raw (Untreated Iron)

Pole

The pole is 169cm tall and fits a Röshult fire basket Original (not included).

Design: Röshults

Part no**: 100003

Materials: Untreated Iron

Measure: 1690 mm / 66.5 in

Weight: 3.7 kg / 8 lb

Colours: Raw (Untreated Iron)

Fire Basket Baron

A majestic fire basket for smaller castles and manors. Will hold about ten times as much firewood as the Röshults fire basket Original.

Design: Anders Norgren

Part no**: 100004

Materials: Untreated Iron

Measure: L 500 D 500 H 1050 mm / L 19.7 D 19.7 H 41.3 in

Weight: 16.5 kg / 36 lb

Colours: Raw (Untreated Iron)

Fire Basket Urban 50

Röshults Urban is a fire basket with inspiration from the functionalist expression. Simple horizontal openings overlapping the corners, spreading the light of a fire like a home radiating light in the dark.

Design: Cornelia Norgren

Part no**: 100005

Materials: Untreated Iron

Measure: L 400 D 250 H 520 mm / L 15.8 D 9.8 H 20.5 in

Weight: 8 kg / 18 lb

Colours: Raw (Untreated Iron)

Fire Basket Urban 70

Röshults Urban is a fire basket with inspiration from the functionalist expression. Simple horizontal openings overlapping the corners, spreading the light of a fire like a home radiating light in the dark.

Design: Cornelia Norgren

Part no**: 100006

Materials: Untreated Iron

Measure: L 540 D 340 H 700 mm / L 21.3 D 13.4 H 27.6 in

Weight: 16 kg / 35 lb

Colours: Raw (Untreated Iron)

** Optional Stainless Steel. Ask for specs.

Material Information

OUTDOOR MATERIAL

Stainless Steel and coating

Stainless steel is not a single alloy, but rather the name applies to a group of iron-based alloys containing a minimum 10.5% chromium. Other elements are added and the chromium content increased to improve the corrosion resistance and heat resisting properties, enhance mechanical properties, and/or improve fabricating characteristics.

The alloy types we use are AISI 304 and AISI 316.

AISI 304 which is the basic chromium-nickel austenitic stainless steel and has been found suitable for a wide range of applications.

AISI 316 which offers more corrosion-resistance through the addition of molybdenum. This grade is desirable where the possibility of severe corrosion exists, such as heavy industrial atmospheres and marine environments.

Stainless Steel needs to be cleaned for aesthetic considerations, and to preserve corrosion resistance. Stainless steel is protected from corrosion by a thin layer of chromium oxide. Oxygen from the atmosphere combines with the chromium in the stainless steel to form this passive chromium oxide film that protects from further corrosion. Any contamination of the surface by dirt or other material, hinders this passivation process and traps corrosive agents, reducing corrosion protection. Thus, some form of routine cleaning is necessary to preserve the appearance and integrity of the surface.

Stainless steel is easily cleaned by several different methods. It actually thrives with frequent cleaning, and, unlike some other materials, it is impossible to "wear out" stainless steel by excessive cleaning.

Dirt and soil can consist of accumulated dust coming from many sources, ranging from the wind to everyday use. These contaminants will vary greatly in their effect on appearance and corrosivity and ease of removal. While some may be easily removed, others may require specific cleaners for effective removal. Frequently, warm water with or without a gentle detergent is sufficient. Next in order are mild non-scratching abrasive powders such as typical household cleaners. These can be used with warm water, bristle brushes, sponges, or clean cloths.

Ordinary carbon steel brushes or steel wool should be avoided as they may leave particles embedded on the surface which can lead to RUSTING. For more aggressive cleaning, a small amount of vinegar can be added to the scouring powder. Cleaning should always be followed by rinsing in clean hot water. When water contains mineral solids, which leave water spots, it is advisable to wipe the surface completely with dry towels.

Coating: Akzo Nobel Noir 2200 Sablé YW360F

Finishes on all our furnitures are made with Akzo Nobel's Interpon D2525 technology. Interpon D2525 is an ultra durable powder coating, which meets the demanding weathering requirements of the leading industry specifications Qualicoat Class 2, GSB. Master, and AAMA 2604-05, as well as BS EN 12206.

Teak

Teak is a golden-brown timber, with excellent grains and texture. It is one of the most demanded wood types in the entire world, due to its beauty and unique properties. Unlike other woods, teak does not warp, crack, become brittle or discolor when in contact with metal, making it an ideal choice for marine use. It is also one of the select few woods that has a naturally high oil content, making it resistant to rotting caused by climatic extremes such as water damages. With its high durability, teak has been a mainstay in the boat building industry for centuries, for use in decking and construction. Teak is also an ideal choice for garden furniture, especially since its natural oil content gives it a high resistance to termites and other insects.

Care instructions

Teak does not need to be protected. It is a unique wood that if left in its natural state, is virtually maintenance-free. Teak can be left outside year around, surviving even the most extreme weather conditions. Although over time, untreated teak furniture which is exposed to the sun will develop a patina and a silvery, grey color. This process is cosmetic and does not harm the strength or quality of the wood.

Teak sealer is often recommended to preserve the natural honey color. Teak sealer contains UV protection to keep the sun from graying the furniture as well as a fungicide to prevent the growth of mould and mildew on the surface of your furniture. Sealer is not the same as varnish. It is meant to preserve the color of the wood and is breathable, letting the natural oils escape without bubbling or peeling like varnish. Sealers and preservatives serve both as protectants and stains. Generally, the darker the stain, the more sun protection it provides, and the less often it needs to be reapplied. Applying the preservative is straightforward. On the first application, the wood should be allowed to stand in the sun for a week or two to allow the wood grain to open. A coat of teak sealer should be sprayed on and rubbed in. Two coats should be applied in this manner. The area underneath the furniture should be protected with a drop cloth or newsprint as most sealers will stain concrete. After the first application, teak sealer should be reapplied every year by cleaning the wood with mild detergent and water and spraying and rubbing in a coat only on the surfaces that get sun.

After the furniture is sealed, very little care is needed to preserve the finish. Occasional washing with soap and water will remove normal soil. Oils from foods, wine, coffee and some condiments will penetrate the sealer and may leave a stain. To avoid this, a teak clear coat can be applied to the table top to improve stain resistance.

It is recommended to wipe off any stain with water and detergent, including normal dirt, stain and spores with mould/fungal or other mouldy/fungal residue. For stubborn stains, use a soft-bristled scrubber (such as kitchen/pot scrubber). Please do not cover your furniture with plastic or any similar material. This will prevent natural airflow, which will cause the timber to sweat and increase humidity. Mould may appear as a result.

It is important to store your furniture in a dry place with good air ventilation. Do not store your furniture near extreme temperature such as a heater. This may cause the timber to shrink/expand and make the joints crack.

Do not expose teak to extreme hot or cold temperatures, such as a hot saucepan/flame or dry ice. This will leave a mark on the furniture. Always use placemats to protect your furniture.

Certification: FSC

Sunbrella® Fabric

Our cushions are made of Sunbrella fabric, a very durable material. With its high water, UV-, mold and mildew resistance, it is ideal for outdoor use. Sunbrella is made of 100% solution dyed acrylic fabrics, colored all the way through the core of the yarn. The color is exceptionally resistant to fading, when exposed to sun or inclement weather. The fabrics are also treated to be highly stain- and water repellent. They dry quickly, which prevents moisture, mold and mildew from building up.

Environment

Sunbrella fabric is Eco-Tex (skin contact) and Greenguard (air quality) certified. Our foam production uses no fluorocarbons or organic volatile solvents.

Material Selection – Fast Dry

We now offer a new material selection called Fast Dry. With a concealed layer of fast dry under the fabric, condensation is prevented from building up, which in turn prevents weather damages. As a result, your outdoor furniture stays beautiful in spite of harsh weather conditions.

Nature Grey

Dark Taupe

Cast Ash

Surlast® Fabric

Surlast is a solution dyed polyester fabric, designed for flexible covers. It features a high UV-, water, mold and mildew resistance, and it has an excellent tear and abrasion resistance. Surlast is water resistant, but not 100% water proof. This maintains the breathability of the fabric, which allows moisture to be transmitted through the material, which prevents mold and mildew. Water resistance – Schmerber ISO 811 850mm.

Care and Cleaning

Surlast is easy to maintain. We recommend the use of lukewarm water and a mild soap solution for regular cleaning. If needed, you may use a soft bristle brush. For tougher stains, you can use a water- and bleach solution. Do not let the solution sit for more than two minutes, rinse thoroughly with cold water and let the material air dry. Do not machine wash.

INDOOR MATERIAL

Leather

Our leather, which comes from Europe, is refined and carefully taken care of in Italy. Each skin celebrates its natural heritage through insect bites and visible scars. We have chosen to use glued two-ply leather, offering its beautiful surface on both sides. The cushions are stuffed with down, to achieve a maximum level of comfort, durability and luxury.

Beige 43024

Black 91035

The Origin of Our Aprons

The Röshults Aprons are made in a small factory in Chennai, India, employing only spouseless women. The women receive a 25% higher salary than minimum level, health insurance for herself and her children, membership in a labor union, one daily meal in the factory cafeteria, and education opportunities. Röshults considers responsibility and quality to be interlinked, and we only select suppliers that meet our high standards in these matters.

Canvas Apron

To achieve the highest quality possible, our canvas is made of 100% cotton of 500 g/sq. m. The fabric is prewashed, so it will not shrink in the wash. It is woven of carefully combed and twined cotton, in warp and weft, for additional resistance to dirt and moisture. The canvas has a high tear and abrasion resistance, and it withstands normal washing and wearing. The edges, made of strong and flexible leather, must be removed before washing. The canvas can occasionally be washed in up to 90°C water, but we recommend 60°C for normal washing. The leather is from India, for more information, see below.

Leather Apron

We only use high-quality cattle leather. It is thoroughly dyed in vats, instead of spray colored, making the color more durable and aesthetically appealing. Spray coloring, although fairly common, is an environmentally harmful method. Spray coloring can also be used to hide structure flaws and other signs of low quality leather. In contrast, dyed leather demonstrates true quality with nothing to hide. We never use sprayed leather for any of our products. Our leather is also tumbled with wood blocks in a wooden drum, to achieve the perfect level of softness. Sustainability concerns are important to us, and our leather always comes from animals whose meat have been used in the food industry, so nothing goes to waste. The leather originates from India.

WARRANTY 2 years limited warranty on all products.

Designers

BROBERG & RIDDERSTRÅLE

Johan Ridderstråle and Mats Broberg have collaborated on various projects since their studies at the University College of Arts, Crafts and Design in Stockholm, Sweden. Their studio Broberg & Ridderstråle is located in Stockholm, where they work on architecture and design. The duo strives to add an emotional value to their design, communicating with the user through recognition of symbols and meanings. They draw inspiration from everyday life and combine a rational approach with a bit of wit. Their designs also acknowledge the clash between the past and the present. Broberg & Ridderstråle have won several prestigious awards, such as the Wallpaper Design Award, the Elle Interior Design Prize, the Good Design Award and Residence Magazine's Designer of the Year.

AMSELL BERLIN

Pia Amsell and Barbro Berlin are educated at Beckmans School of Design where they studied product and furniture design. Amsell Berlin Designstudio was established 2004 in Stockholm, Sweden. The studio's work cover design of different products like tableware, lighting, furniture and textiles. Pia Amsell and Barbro Berlin have a passionate interest in food- and drink-related products. They have designed and developed several collections of utensils and knives in collaboration with professional chefs. They make deep research in every project and have also a great interest in influencing trends. The ambition is to create functional and harmonic products for daily life as well as for celebrations. The design has often a timeless, uneffected expression that is easy to assimilate.

CORNELIA LINDLÖF

Cornelia Lindlöf owns the design studio Neongrå in Stockholm. She pursued her education in Art & Form 2001-2003 (Per Brahe). She has a Bachelor of Science in Civil Engineering, with a specialisation in building projects with architectural technology. She finds inspiration in the architecture of urban environments.

ANDERS NORGREN

Anders Norgren (1945 – 2016) lived in Jönköping, Sweden. He was an author, psychiatric nurse and philosopher. Anders designed the original Røshults Fire basket. Influenced by his professions, he found inspiration in human values as well as in human needs.

MATHIAS DE FERM

Mathias De Ferm (1985) is a renowned product and furniture designer from Antwerp, Belgium. Aspiring to add value to the daily life, his work has a strong focus on practicality and function. His designs, demonstrating his passion for innovation, often center around the social aspects of human life and well-being.

MICHAEL LÖFMAN

Michael, based in Zug, Switzerland, is an autodidakt design, architecture, and art enthusiast. Michael creates the pieces that he wants to possess himself. He is combining functional efficiency with a minimalist aesthetic appeal, eliminating the unimportant but never compromising beauty. He often finds inspiration in the Swiss mountains, whether it's snowboarding, mountain biking, or just walking around enjoying Mother Nature.
